Experience

Programmer Analyst , Cognizant Technology

Aug 2020 - Present

E-Commerce UI testing automation

Use Selenium to perform automated testing of the UI of an e-commerce website. The Project was made on the TestNG Test framework in Maven Framework.

- It picks the top 5 phones from the website whose price is below 10K INR and stores the result in an Excel Sheet .

Tech Used: Selenium using Java, Eclipse.

Automation Database/Services Testing

Mar 2021 - Present

Client: Blue Shield of California

Automated the Database testing process for clients.

Tasks included creating suites for reading FlatFiles to compare with database values.

Web Services API testing - In this we have to create test cases to test the APIs. These test cases will send appropriate JSONs and will verify the response accordingly.

Tech Used: Java 8 , SQL, Katalon, Groovy, Insomnia.

Tech Skills

Programming Language: C/C++,Java, JavaScript.

Backend development: NodeJs.

Data Processing and Storage: MySQL, MongoDB.

Front-end development: React JS, JavaScript, HTML/CSS.

Education

B.Tech in Computer Science

Graphic Era Hill University, Bhimtal
2016-2020

Intermediate

Kendriya Vidhyalaya, Haldwani Cantt.
2015

Courses

Data structures and Algorithms, Object Oriented Design, System Design, Microservices, Web Technology, Virtualization, Cloud Computing

Interest

Competitive Programming, Stock Market, New Tech.

Projects

Spell Checker

Spell Checker is an app designed for making texts, notes, essays, etc spelling mistakes free.

- A user can simply paste a text or upload a text file to check spelling mistakes.
- The app will also give suggestions to correct the mistakes.By choosing a suggestion from the list of suggestions the spelling will get corrected in the text.
